

Together with the Shanghai Mathematical Society, East China Normal University (ECNU) will take the responsibility of organizing ICME-14.

Aiming to cultivate thousands of qualified teachers for the new-born republic, ECNU was founded in Shanghai in October 1951 by merging several then well-known private universities. After 65-year's development, ECNU now is a comprehensive research university. Currently, the university employs 4,331 staffs, academic and non-academic, and enrolls 36,311 students, among them 21,928 being graduate students. Keeping in mind its original goal, ECNU still pays great attention to teacher education and education research, and it is commonly regarded as one of the leading powers of teacher education in China.

Having two campuses with a total area of over 207 hectares, ECNU has long been reputed as a garden university for its beautiful campus scenery.

*Welcome to Shanghai*

The 14<sup>th</sup> International  
Congress on  
Mathematical education  
(ICME-14)

Shanghai, China  
July 12<sup>th</sup> – 19<sup>th</sup>, 2020

Website: <http://icmel4.org>  
E-mail: [icmel4@icmel4.org](mailto:icmel4@icmel4.org)

As a member of International Mathematical Union (IMU) and a member of International Commission on Mathematical Instruction (ICMI), the Chinese Mathematical Society (CMS) is the bidding and hosting body of ICME-14, 2020, in Shanghai.

Founded in 1935 in Shanghai, CMS is a national academic association for Chinese mathematicians and mathematical educators, aiming to promote the research and popularization of mathematics in China and enhance both the development of China's science and technology and the modernization of the country.

CMS has a long tradition of caring about and supporting the research and practice of mathematics education. As early as in 1980, then CMS president Lokeng Hwa attended ICME-4. Affiliated to CMS, there are several committees related to mathematics education. CMS always gives its full support to academic activities on mathematics education, and it publishes journals serving mathematics education.

## Address of Welcome

As the congress chair of ICME-14, I cordially invite all to participate in the congress to be held in Shanghai from July 12th to 19th, 2020.

China is an ancient country with a 5,000-year history of civilization and a brilliant history of mathematics and mathematics education. In recent 100 years, the introduction of western mathematics and mathematics education and their integration with traditional Chinese culture and education have fostered new achievements in mathematics education of modern China.

Shanghai, a famous metropolis in the Far East, is the engine for the economic and social development of China and a window of China's opening-up policy. In addition, it is also the cradle of modern Chinese mathematics and mathematics education and the birthplace of the Chinese Mathematical Society. East China Normal University is one of the top universities in China and takes the lead in the development of teacher education in China. The mathematics education team of ECNU has a great influence both at home and abroad. Taking consideration of all these facts, I believe that the ICME-14 hosted in Shanghai will be a grand academic congress and a great surprise for the colleagues around the world.

I am very much looking forward to seeing you at ICME-14 in Shanghai and am sure that your participation will contribute to the success of the ICME-14.

## Activities

The ICME -14 programme will contain, as in previous congresses, activities such as

- Plenary Lectures
- Panel Debates
- Surveys
- Regular Lectures
- National Presentations
- Discussion Groups
- ICMI Study Groups
- Topic Study Groups, and
- Posters

During the congress a Mathematical Exhibition will be on display and some social activities will also be arranged.

## The Venue

Shanghai Convention & Exhibition Center of International Sourcing (SCECIS), located in Changfeng Ecological & Business Park in Putuo District and with a total construction area of 145,338 square meters, is selected as the venue for ICME-14. Facing Suzhou River – the mother river of Shanghai in the south, bordering on Changfeng Park in the east, SCECIS enjoys a beautiful neighborhood. Within 500 meters of SCECIS, several business plazas such as Guosheng Center and Changfeng Parkside Plaza are ideal places for shopping and dining. Two metro lines, Line 2 and Line 13, run through this area (the third one, Line 15, is in construction) with stations within walking distance. In particular, Metro Line 2 connects the two major airports of Shanghai (Pudong International Airport and Hongqiao International Airport), and it will give ICME-14 participants a great convenience.
